

Ignite Your Productivity!

SmartDraft 9 is a powerful drafting toolbox for AutoCAD 2007 - 2012 / Civil 3D 2007 - 2012

Note: SmartDraft will **NOT** run in any version of AutoCAD LT.

Wetland Studies and Solutions, Inc. Copyright (c) 1989-2011

Important: The installation **does not** automatically load the SmartDraft menu. After installation, open AutoCAD, start the CUILOAD command, and select the SmartDraft menu in the <installation folder> per the AutoCAD Setup instructions below.

SMARTDRAFT MANUAL

The [SmartDraft Manual](#), in PDF format, is in the SmartDraft's installation folder.

If you have customized SmartDraft to follow your own CAD standards, review these changes to the Customization Template and Style files and make any of the changes necessary to the files in your Customization Templates.

SETUP

1. Make a backup copy of the original media.
2. You will need 65 MB of free disk space to complete the installation process.
The software can be installed on a local or network drive (See [License Agreement](#)).
3. Run the: a. SmartDraft 9.exe
Enter destination drive and folder
4. Add SmartDraft to any AutoCAD profiles: Select the desired profile(s) from the AcadInstall dialog

Site license:

Copy the provided license file (smart.lic) to the program's installation folder

The default installation folder is C:\Program Files\SmartDraft

SMARTDRAFT CUSTOMIZATION INSTRUCTIONS

Customization Templates

Customization Template files for the program are located in the program's installation subfolder \Template
Users must have Read and Write Rights to this folder and subfolders to edit or customize SmartDraft

The customization folder \Template can be located and/or named as needed on your system. If it is not placed in the default location, the PROJDIR= pointer in the RACSETUP.INI file must be edited to reflect change in the location and/or name

Sample: RACSETUP.INI

[Program]

PROJDIR=C:\Program Files\SmartDraft\Template < resource folder name/location after the =
